Description When adding Members to a Group, a checklist is show where all Actors that one wants to add to a Group can be checked. It would be great if the Actors who are already in the Group are checked in the list automatically or if the checkbox next to them would be greyed out.

Its not a bug its a feature ;)

Seriously, it is possible (and needed) to add a member to a group again e.g. with different dates and/or a different type. If it is a complex group and/or a group with a long and eventful history many actors can have multiple "memberships".

So checking them would be wrong but I keep your suggestion in mind to mark already added members in case unintended multiple memberships happen too often.

Thanks for reporting.
